Technical Skills

General IT knowhow

Software design patterns, database design, agile methodologies (scrum, kanban, XP), object-oriented programming, full-stack web development.

Project experience highlights

- ⭐ TV series dicovery and tracking application (.NET Core GraphQL API + Angular web app)
- ⭐ Walk app for charity Action Damien (.NET Core REST API + Angular web app + Android app)
- ⭐ Event management system (.NET MVC web app + Java desktop back-office with JavaFX GUI)

Click the star icons or check out my website for more information, demos and screenshots.

Tools, techs and languages

C#	.NET	Java	Python	Javascript	Typescript	Angular	HTML

CSS	SCSS	Bootstrap	Hugo	SQL	GraphQL	Git

Future experimentation

Blazor, Xamarin, WebWindow, SignalR, MAUI, Go, Docker, Kubernetes, serverless architecture, headless CMS ...

Experience

Spring 2021	**Software Engineer** (international internship)	Smapiot (Munich, DE)

Software engineer for internal and external projects. Contributing to Piral, an open-source software framework for modular frontend applications. Definition and development of automated tests. Setup and configuration of CI/CD processes. Active participating in software development mainly aligned to the scrum methodology

Summer 2020	**Developer** (student job)	Novado

Software developer focussing on full-stack web development, process automation, database scripting and much more. Technologies used: C# .NET Core, SQL, WPF, ...

Summer 2019	**Administrative Assistant** (student job)	Continental Cargo Carriers

My job was to assist the administrative team in managing freight documents and other paperwork; and process them through our new IT system. I also offered to assist by doing business process improvement: I wrote a script which saved our admin team one afternoon a week, for example. Additionally, I lend a helping hand with customer communication and assistance.

2017 - 2019	**Observatory Tour Guide** (student job)	Cozmix

My responsibility was educating groups of visitors on guided tours through the observatory. Tasks include operating the planetarium and telescopes while explaining the basics of astronomy, as well as guiding through the exhibition, dealing with administrative tasks and managing ticket sales.

2013 - 2017	**Hospitality employee** (multiple student jobs)	...

Taking and preparing orders for mainly tourists and students. Mostly very busy places.

Education

2018 - 2021	**Applied Information Technology**	Ghent University College
	Professional Bachelor (specialization: app development)	

2016 - 2018	**Physics and Astronomy**	Ghent University
	Bachelor of Science (did not finish)	

2010 - 2016	**Latin, Sciences-Maths 8**	St. Francis Xavier Institute Bruges
	Secondary Education
